It is service base company. Her I worked as a **Senior Android Developer.** My main responsibility is coding, Designing and maintaining the existing Mobile application.

> **ADVANTAL Technology Pvt. Ltd, GURGAON**   Jun'2012 to May'2014 (2 years)
> It is service as well as product based company .Her I worked as a **Subject Matter Expert.**
> My main responsibility is coding and designing of Mobile Application in Structured way.

TECHNICAL SKILLS:

- **Language**: Core JAVA, Kotlin, Rx Java
- **Technologies**: Android SDK, JSON, Rest API, XML, MAP, NFC, Bluetooth
- **Database**: SQLITE, MYSQL
- **Design Pattern**: MVC, MVP, MVVM
- **Version Control**: Git, Bitbucket
- **Network Library**: Volley, Retrofit
- **Third Party Libraries**: Agora voice call, Socket.IO, Firebase, Biometric, OCR, KYC (Aadhar/Pan), Firebase Notification, Facebook, Google, Jetpack Compose
- **App security SDK**: Lookout, Shield
- **Tools**: Postman for API testing, JIRA
- **IDE (Integrated Development Environment)** : Android Studio, Eclipse

EDUCATIONAL QUALIFICATION:

M.C.A From Integral University, LUCKNOW with an aggregate of **73%** marks

*Key Projects***:**

1- Infinigent (Employee Management App) - 8 months

Client: Infinigent Software Solution
Role: Developer, Consultant Lead
Language: Kotlin
Tools/IDE: Android Studio
Team Size: 6 members
Project Link: https://play.google.com/store/apps/details?id=com.infinigent.infinigent&hl=en_US&gl=US

Project Description

Infinigent Mobile App helps businesses bring HR closer to their employees, so they are more engaged, more productive, and much smarter about the way they work. The App provides a native, ability to meet strict security standards, manageability of features and functionalities in mobile devices and optimized procedures for mobile performance.

Responsibilities & Project Deliverables

- Client Interaction, Team handling Design & develop applications, unit testing, bug fixes and delivery.
- End to end Design and development of app modules.
- Write standard code structures.

2- Alaam (Education App) - 8 months

Client: Alaam
Role: Developer, Consultant Lead
Language: Kotlin
Tools/IDE: Android Studio

Team Size: 12 members
Project Link: https://play.google.com/store/apps/details?id=com.alaam.alaam&hl=en_US&gl=US

Project Description

Responsibilities & Project Deliverables

- Team handling Design & develop applications, unit testing, bug fixes and delivery.
- End to end Design and development of app modules.
- Creation of module and component using Android, Invoid SDK(PAN/Aadhar), Socket.IO

4- Transit (Banking App) - 8 months

Client: Axis Bank
Role: Developer, Consultant Lead
Technologies: Android with Java
Tools/IDE: Android Studio
Team Size: 2 members

Project Description

Transit is a product for Kochi Metro Card issuance, initiated by **Axis Bank**. User can use this card for metro travelling.

Responsibilities & Project Deliverables

- Team handling Design & develop applications, unit testing, bug fixes and delivery.
- End to end Design and development of app modules.

5- AIRSEWA (Travelers App) - 8 months (50k+ downloads)

Client: Ministry of Civil Aviation, Government of India
Role: Developer
Technologies: Android with Java
Tools/IDE: Android Studio
Team Size: 14 members
Project Link: https://play.google.com/store/apps/details?id=aero.aai.airsewa&hl=en_US&gl=US

Project Description

AirSewa is an initiative by the **Ministry of Civil Aviation, Government of India**. It provides a common platform for air travelers to submit air travel related grievances and seek information about flight or airport operation in India.

Responsibilities & Project Deliverables

- Team handling Design & develop applications, unit testing, bug fixes and delivery.
- End to end Design and development of app modules and App documentation.

6- E-GANNA (Agriculture) - 1 years (3M downloads)

Client: U.P. Government
Role: Developer
Technologies: Android with Java
Tools/IDE: Android Studio
Team Size: 3 members
Project Link: https://play.google.com/store/apps/details?id=com.e.ganna.net&hl=en_US&gl=US

Project Description

E-GANNA App for Indian sugarcane Factory, where a register farmer can view the sugarcane related Information. It provides real time information of **cane survey, calendar, supply ticket, sugarcane receipts, payments**, and **SMS.**

Responsibilities & Project Deliverables

- Design & develop applications, unit testing, bug fixes and delivery.
- End to end Design and development of app modules and App documentation.

7- EWS (Agriculture) - 1.5 years

Client: Kenya, Rwanda, And Nigeria
Role: Developer
Technologies: Android with Java
Tools/IDE: Android Studio
Team Size: 5 members

Project Description

It provides Electronic WEIGHMENT system which communicates external Bluetooth device 'Smart Weighing scale'. Hew we capture the weight of our Tea leaf, Milk, Sugarcane, Banana etc.   You can also take a print using external Bluetooth device.

Responsibilities & Project Deliverables

- Design & develop applications, unit testing, bug fixes and delivery.
- End to end Design and development of app modules and App documentation.
- Creation of module and component using Android, NFC, Bluetooth, SQLite

8- SOFTCALL - 9 months

Client: Australia
Role: Developer
Technologies: Android with Java
Tools/IDE: Eclipse
Team Size: 10 members

Project Description

SOFTCALL a VOIP and Chatting based application. The main feature of this app –Normal call, Video call, Conference call and IM base messaging (Normal and Group chatting).Social AP like Face Book, Twitter integration

Responsibilities & Project Deliverables

- Design & develop applications, unit testing, bug fixes and delivery.
- End to end Design and development of app modules and App documentation.
- Creation of module and component using Android, Asmack, PjSip .

*Strength***:**

Self Improvement, Good Team player, Time management, Problem solver, Good listener and observers, Adapt easily and quick to improvise.

Personal Details:

- **Nationality**: Indian
- **Date Of Birth**: 07/10/1986
